EXPERIENCE

Team Lead Developer

Wataha Group, Dec 2023 - ongoing

- Designed and developed multiple SPA websites using Next.js, Tailwind, and PostgreSQL.
- Improved UX and accessibility by developing with ally best practices and implementing dynamic GSAP animations on the frontend, following thorough client consultations to identify and meet their needs.
- Managed a team of designers and developers, implementing effective management processes and workflow frameworks for streamlined project execution.

Regular Fullstack Developer

LLInformatics, Jul 2021 - Dec 2023

- Led the entire feature creation process from collecting business requirements, system design, consulting, development, to testing, ensuring seamless project delivery.
- Successfully developed proof of concept projects in early phases, showcasing innovative technologies including blockchain.
- Maintained projects built with Elixir, Phoenix, LiveView, PostgreSQL and React.js.
- Mentored a Junior Frontend Developer, creating comprehensive onboarding and learning materials to improve team efficiency and consistency.
- Achieved a significant reduction in API response time and bandwidth usage by implementing a caching system using Redis for a translation management project.

Team Lead Developer

Topic (co-founded startup), 2020

- Developed a high-performance SSG website with Gatsby and a CSR app with React and Redux, improving speed and state management.
- Architected a project framework with WebRTC technology, enhancing real-time communication.
- Boosted user satisfaction by designing responsive web and mobile apps with strong UI/UX principles using Figma, Adobe XD, and Photoshop

SKILLS

Frontend

React.js
TypeScript
HTML/SCSS
Tailwind CSS
GSAP
Phoenix

Backend

Next.js
Node.js
Elixir
PostgreSQL

General

Linux
MacOS
Finance
Blockchain
Management

Tools

Git
Figma
Photoshop
Illustrator

EDUCATION

Bachelor of Engineering IT Management Techniques Computer Science specialty.

2020 - 2024

WIT Warsaw School of
Information Technology

OPEN SOURCE

react-leaf-polls

Set of multiple reusable and customizable poll components developed in React.

gh-manager

CLI tool for listing daily issues worked on developed in Rust.
